

Favaron

The company

The Favaron group – comprising the brands of Favaron, Favaron Due and Favaron Design – has been successfully engaged for many years in the business of articles and accessories for furnishing and industrial applications.

Being able to count on a long and consolidated experience in the production of plastics, the firm Favaron from Noventa Padovana (Padua) has a headcount of more than 30 people, all engaged in assuring maximum satisfaction to their customers. Flexibility, a dynamic approach and the ability to evolve continuously, aided by technology and experience, are all factors that keep this firm on its toes and in a favourable position to obtain excellent results in a short space of time, and to respond to the needs of all those sectors in which plastic plays an important role. In recent years, Favaron's activity has particularly targeted the furniture industry, by supplying over 1500 high quality plastic accessories at competitive prices, while penetrating a specific domestic and international market. Favaron Design and Favaron Due have now joined the Favaron company. Of the two newcomers, the latter, which has been operative since 2002, is known for its modern technological plants and for the important support it gives to the Mother Company.
